**Instructions**: The highlighted phrases below represent candidate information types that may or may not be personal. Please indicate your willingness to share the information type with a third party for any purpose, while thinking about the benefits that this app provides to you.

If the phrase is not an information type, please check the corresponding checkbox and move on to the next question.

Scenario: From this screen is where i can change everything personal about my `profile` along with looking at my `friends` and then adding different parts to my `account`. It is made incredibly easy and simple to do with good labels and good responses from the tab that lets me easily get to everything i need to. If i want to add something to my `story` i could easily upload a `picture` or a `video` without having to actually shoot it in app which is nice. Alongside that i can easily see all of my friends and current `friend requests` in case i am looking to add someone or remove someone. If i scroll down a bit i can see my location and others `locations` who are using the app also and uploading their `location` which is very helpful for when i want to connect with someone but i am unaware if they are in town etc.

1. How willing are you to share information about **profile** with a third-party for any purpose?
☐ Check here, if this is not an informatio type.
